

NETWORK OF SPECIALISTS

GEN is a registered not-for-profit in Scotland that cooperates with 5 global regions. Consultants are available from all around the globe. These experts are experienced in adapting globally tested solutions to local situations, ensuring the process or methodology is adapted to climate, context and circumstance.

SUSTAINABLE DEVELOPMENT GOALS

GEN provides solutions to strive towards local implementation of each of the 17 SDG's and the Paris Climate Agreements. GEN has UN Consultative status and works at the UN to advocate for ecovillages.

KNOWLEDGE BANK

Supplement your journey by learning with our educational resources and courses. Visit our website for more details about how our Consultancy Service can work for you, and to find out about our research team, and our partners.

GEN CONSULTANCY

The GEN Consultancy seeks to share some of the world's best practices in the field of community regeneration and resilience through a highly skilled and diverse network of expert consultants.

We draw on our network of expert consultants who have been involved in varying climates and contexts to bring alternatives and proven solutions.

GEN takes a holistic approach. Which is why we custom tailor Consultation Services and provide action plans to advise on social, ecological, economic, and cultural dimensions.

GLOBAL
ECOVILLAGE
NETWORK

RESILIENCY AND REGENERATION FROM EACH PERSPECTIVE

SOCIAL RESILIENCY

Cooperation is a powerful force in the universe. We can assist with decision making models, conflict resolution, and advice to navigate group dynamics.

ECOLOGICAL REGENERATION

What if our impact on the planet was restorative rather than depleting? We can serve your plans for clean energy, sustainable agriculture, water and waste management, natural building and ecosystem restoration.

ECONOMIC SUSTAINABILITY

Develop financial planning, economic systems, and business models that work for your community. We can work to empower the creativity and ingenuity of your organisation to produce self-sufficiency.

CULTURAL HERITAGE

How can cultural heritage become a powerful force for positive change? We can help to recognise, honour, and nurture cultural perspectives while embracing appropriate innovations.

WHOLE SYSTEMS DESIGN

GEN approaches sustainability and provides consultations from a Whole Systems Design methodology. This includes an effort to account for and engage all stakeholders in designs, and to design fitting solutions for your particular project's scale, budget, vision, ecosystem, and purpose.

SERVICES:

ESSENTIAL ASSESSMENT

The main focus of this consultation is to determine what you need and to provide our best advice for your next steps, including links to resources and solutions, and advice on additional consultancy services.

ADVANCED CONSULTATION

This consultation provides advice custom tailored to your needs. It dives deep into one or more issues or a dimension of sustainability.

DIMENSION ASSESSMENT

This package includes a deep analysis, reporting, and remote or in-person work to ascertain the goals, needs, and issues, and to offer a comprehensive plan for any of the dimensions of sustainability.

IN COUNTRY VISIT

GEN's Consultants will come up with a cohesive plan for your ecovillage, community, or project that advises on each of the 4 dimensions of sustainability, resulting in a comprehensive Sustainability Plan.
